INTERNSHIP

AWS Data Engineering Virtual Internship *via EduSkills & AICTE* Apr – June 2024

- Learned to move, clean, and organize data into data lakes and warehouses using AWS Glue and Athena.
- Explored AWS services like **S3**, **Redshift**, **Glue**, **Athena**, **IAM**, **CloudWatch**, and **CloudFormation**.
- Gained foundational knowledge of scalable, serverless cloud-based data engineering workflows.

PROJECTS

Pet Adoption and Accessories Management System — MERN Stack [Live Project] **May 2024**

· Built a full-stack web application using MongoDB, Express.js, React and Node.js.
· Configured features for pet adoption, product listings, user authentication, and adoption request management.
· Enhanced the application with a real-time inventory system to track product availability.

Balancing diets and detecting nutrient deficits — Java Full Stack [Live project] **December 2024**

· Designed a role-based web application using Java, JSP, Servlets and MySQL for personalized diet planning.
· Implemented user authentication with session management and applied MVC architecture for scalability.
· Enabled dietitians to create personalized nutrition plans and users to access them through profile-based views.

Created 7+ interactive games and mini-projects using front-end technologies — Viewable on my [Portfolio]**.**
